

Unboxing

Welcome to EXCAP! ☑ Let's get your new trackers out of the box and ready for action. This page covers everything in the kit, how to attach the trackers to your body, and a few simple tips to make your first setup smooth and stress-free.

What's in the Box

Open the package and check that you have received all the items listed below.

Packing List

①

②

③

④

⑤

⑥

⑦

⑧

① Excap Tracker x8

② Camera x1

③ 2.4G Receiver x1

④ Stickers x1

⑤ Charge Docker x1

⑥ Camera Cable x1

⑦ Charge Cable x1

⑧ Strap Long x2, medium x2, short x4

“  **Note:** Keep the box and inserts in case you need to store or transport the trackers later. The straps and stickers are small and easy to misplace.

How to Wear Your Trackers

Thread the strap through each tracker and fasten it at the position shown below.

- The tracker's button side must face upward.
- The tracker should be on the front of your body.
- Keep the tracker from sliding as much as possible.
- Both 6-point and 8-point tracking are supported. Foot trackers are optional if you do not need ankle movement.

We recommend starting with the 6-point setup. If you are using foot trackers, mount them about one-quarter of the way down the inside of each foot.

“  **Tip:** Tighten the straps so the trackers stay in place, but not so tight that they become uncomfortable during long sessions.

Label Your Trackers

For quick identification and correct placement, EXCAP provides sticker labels for each tracker position. Each tracker is assigned a default body position the first time it starts up.

Click a device card in Excap Studio to see which position it is paired to, then attach the matching sticker to that tracker's casing.

📌 **Tip:** Labeling your trackers now will save you time every time you put them on later.
